

User guide

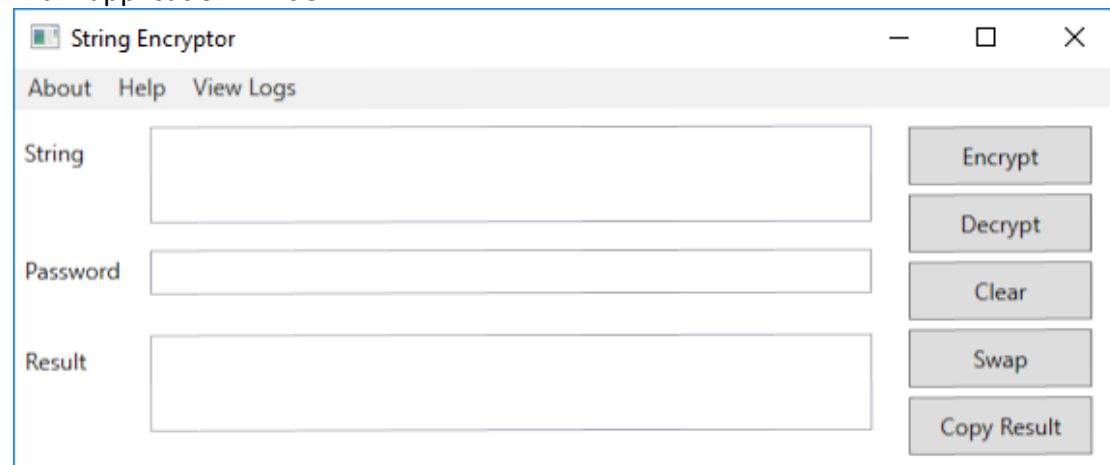

Encrypting/Decrypting

Enter text you want to encrypt or decrypt and password, then click accordingly *Encrypt* or *Decrypt* button.

Other button functions:

- *Clear* – clears all fields
- *Swap* – moves result to string field
- *Copy result* – copies result to clipboard
- *About* – opens window with information about author and application itself
- *Help* – opens help window
- *View Logs* – opens Log Viewer

Main application window:

The screenshot shows the 'String Encryptor' application window. It has a title bar with the text 'String Encryptor' and standard window controls (minimize, maximize, close). Below the title bar is a menu bar with three items: 'About', 'Help', and 'View Logs'. The main area of the window contains three input fields and a column of five buttons. The first input field is labeled 'String' and is empty. The second input field is labeled 'Password' and is empty. The third input field is labeled 'Result' and is empty. To the right of these fields are five buttons: 'Encrypt', 'Decrypt', 'Clear', 'Swap', and 'Copy Result'. The buttons are arranged vertically and are all disabled (grayed out).
